

GET Enroll is a web application developed for the end-to-end management of enrollment operations through the capture, registration and management of biographic and biometric data. With GET Enroll, you can capture fingerprints, iris, face, signature, as well as personal information and documents. It consolidates quality, consistency and security criteria into one solution.

GET Group has identified the secure enrollment of citizens as the primary stage of security document issuance, and has developed the versatile and tool-rich application GET Enroll to address the various functions and processes involved in such operations.

Enrollment	Validation	Data Export
Customizable workflow based on project requirements	Enhancing and validating biometric data	Online data export
Integrates with third-party systems to obtain citizen data	ABIS systems for online record deduplication check	Secure storage of data in offline mode
	Portrait image enhancement and validation	
Real-time face, fingerprint & iris ICAO/ISO compliance check	Automatic detection of fingerprint duplication	XML-based data export to third-party systems
	Fingerprint score retrieval	Data encryption
Automatic photo cropping and background removal	Left and right hand recognition	

Features & Benefits

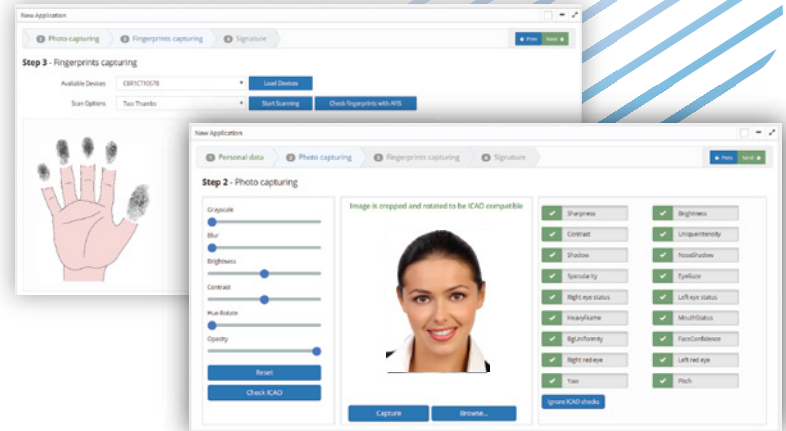

- ▶ User-Friendly and easy to use software
- ▶ Customizable production workflow
- ▶ Customizable components
 - ▶ Integration with third-party biometrics readers, scanners and systems
 - ▶ Features to combine biometric functions to meet registration or validation requirements
- ▶ Optimum data security
 - ▶ Encrypted data
 - ▶ Access levels and user privileges management
 - ▶ Secure data storage (local, USB or backend database)
- ▶ Easy Deployment

Compatible Devices

- ▶ Fingerprint Scanner
- ▶ Signature Pad
- ▶ Smart card reader
- ▶ Issuance Systems (Printer, Document Scanner)
- ▶ Iris Scanner

Standards Compliance

- ▶ ISO/IEC 19794-4
- ▶ ISO/IEC 19794-5
- ▶ ISO/IEC 19794-6
- ▶ ICAO Doc 9303

WHY GET GROUP
