

**FOR BETTER TOMORROW**

## VACCINE MANAGEMENT SYSTEM

GET VACCEMA is a complete holistic solution based on the latest international guidelines and best practices that define the technological and operational methods handling the vaccination processes from vaccines supply chain management to the creation and verification of secure credentials.

GET VACCEMA aims to facilitate international travel procedures by first connecting persons to their COVID-19 test or vaccination status then helping governments effectively verify the authenticity of those tests and vaccination certificates in the most seamless technique, which could help fully restart international travel eventually.

- ▷ Highest level of security and data privacy
- ▷ Flexible and scalable to fit any approach
- ▷ Easily verifiable credentials suitable for endless use cases
- ▷ Open platform for easier integration with other systems

### Key Solution offering
